ABOUT ME

I am a responsible, organized, highly creative, and detail-oriented individual. I love the idea of working in a communicative team where we contribute ideas and solutions. I enjoy challenges.
I spent 6 years studying and working as a veterinarian.
Currently, I am pursuing a degree in Web Design and Programming.

PORTFOLIO

PROFESSIONAL EXPERIENCE

Software developer

Panacea Fintech - March 2023 (By contractor, 3 months)

I focused on troubleshooting both frontend and backend issues on their web platform. I developed a system for a virtual wallet, incorporating various features such as QR code generation, private key management, public address management, and the design of printable vouchers for users.

Highlights of this position:

- I acquired key skills in using Postman and MySQL.
- I understood the importance of reading documentation and the ability to search for solutions to problems.
- This position represented a stimulating challenge that allowed me to grow professionally.
- Working in a company gave me the opportunity to employ agile methodologies, enabling me to collaborate effectively.

Frontend developer (freelance)

June 2023 - January 2024

I dedicated myself to projects for a variety of companies, startups, and individuals, experiencing significant professional growth. Facing challenges independently, this journey has allowed me to continuously expand my knowledge and skills

Frontend developer

Aiko Dev / December 2023 - Present

My responsibility involves code troubleshooting and creating new sections for your website. Currently, I'm dedicating time to training myself to teach a web development course on your platform, enabling me to deepen my knowledge and share my expertise with others.
